An aspiring full stack software engineer, graduated from Coding Dojo bootcamp. Seeking to fulfill a challenging role to grow my skills. Able to build full-fledged web applications in Javascript , Python and C#. Demonstrated ability to learn new technologies and apply them to create efficient applications . I have a great passion for teamwork & collaboration sincel believe there's plenty of opportunities to learn new concepts and collectively assemble new ideas .

PROJECTS

3Dreamprint.com—Designed and built a fully functional Crud web app by using Node.js & Express on the backend , React & Bootstrap for UX/UI and Mongo as the DB , 3DP is a platform for 3D engineers to reach to people with no resources to 3D printing , therefore 3DreamPrint was born.

Milliyar.com REACT— Architected a fully functional e-Com webapp for my own clothing brand , using redux for state management for products and orders ,babel to convert ECMAscript into backwards compatible versions of Javascript for current and older browser and fully responsive for all devices, Webapp was deployed with LightSail by AWS(Disabled) & also Heroku.

Bubbled —Visual graphic canvas with special effects made with Paper j.s , when the user clicks any button on the keyboard creates sound supported by Howler.js, users can also record what they made.

Milliyar.com DJANGO— Recreated Milliyar with Django for ease of use with SQLite to avoid data interruption , ditched the login authentication to allow ease of guest use, user info is registered in checkout page and managed through Django's administrative feature for product and order management.Materialize.ui and bootstrap was used for frontend & fully responsive ,Deployed with AWS's EC2 & Route 53.

Pharmastic— Pharmastic is a delivery business established by myself and two partners , specializing in pharmaceutical medical deliveries. This website was created as a landing page with infographics about the company as well as a platform to receive messages through our serverless forms using Formspree.js. Smoothscroll.js was also used for ease of scroll the default scroll delay.
