Faris Alahmad

Full Stack Software Engineer

I learned by building things, breaking them, and figuring out why. These days I work across web, mobile, and SaaS, taking ideas from a rough sketch to a real product. I care about clean interfaces, dependable systems, and shipping software people can actually use.

PROJECTS

ChartSense.trade Owner and sole builder
Full SaaS trading education platform built solo from zero to production. It supports real users and paid Stripe subscriptions, with paper trading, live market data, AI-assisted journaling via OpenAI, 24/7 automated monitoring via Puppeteer, real-time charting, web push notifications, and transactional email. Designed and built the full backend, including auth, billing, cron jobs, and storage.
Next.js 14, MongoDB, Firebase, Stripe, OpenAI API, Puppeteer, Google Cloud Storage, Three.js, JWT, Sentry

SMK Auto Dealership CRM
Enterprise-grade, white-label dealership management system: lead tracking, inventory, appointment scheduling, financial reporting with interactive charts, and admin/sales role separation.
Next.js 15, React 19, PostgreSQL, Prisma, Auth.js, Recharts, Tailwind CSS

Perpulator Perp Futures Calculator
Precision calculator for perpetual futures traders: weighted average entry across chained adjustments, direction-aware PNL, leverage-aware sizing, live liquidation price, and risk/reward. Built in TypeScript with Jest test coverage.
TypeScript, Next.js, CoinGecko API, Jest, Tailwind CSS

3D4P Prosthetics for Palestine
Open-source humanitarian platform connecting amputees in conflict zones with volunteers willing to 3D-print prosthetics, with AI content moderation, a 48-hour member verification pipeline, and Stripe donations.
Django, Python, PostgreSQL, OpenAI, Stripe, Railway

HorizonTransport NEMT Route Tracker
PWA route tracker for NEMT drivers that logs routes, stops, mileage, and trip info with an interactive map and offline-capable persistence. Built out of necessity, used in the real world.
React, Vite, Leaflet, Zustand, PWA, Tailwind CSS, OpenRouteService

Alahmad Family Tree Interactive Family Registry
Bilingual registry mapping 142 members across graph, 3D, and olive-tree views, with search, member profiles, photo management, and role-based access.
Next.js 16, TypeScript, React Flow, Dagre, Three.js, React Three Fiber

AGENT SYSTEMS

ChartSensei Persistent second developer for ChartSense
Private agent that carries architecture, decisions, known bugs, and roadmap across sessions; reads and edits code, traces production issues, runs builds and tests, and prepares Railway releases behind explicit guardrails.

Alfred Personal butler and future robotics agent
Persistent agent with one shared memory across Telegram, voice calls, and workspace files, using Twilio, ElevenLabs, and a FastAPI bridge.

Dexter / ChartDoc Trading research and sandbox decision system
Private research brain that reviews strategy alerts, context, and risk before paper trades in ChartSense, with post-trade forensics feeding outcome memory.

FarisWayne Client intake, filtering, and SMS agent
Workflow agent that watches Acuity and Gmail, routes exceptions into Telegram topics, and runs the appointment SMS lifecycle with reply detection.

TECH STACK

React, Next.js, TypeScript, Three.js, Python, Django, Node.js, MongoDB, PostgreSQL, AWS S3, Firebase, Stripe, React Native, Expo, Tailwind CSS, OpenClaw

MORE BUILDS

Bubbled 3D
React, Three.js, Tone.js

Milliyar
Django, Stripe, AWS S3

StorageSwipe
React Native, Expo, iOS

StormCatcher
Expo, React Native, TypeScript

SoberRoute
React, Mapbox, TypeScript

Arabic Center Services
Node.js, Express, HTML

TimeKeeper
Swift, iOS

EDUCATION

Coding Dojo
Full Stack Web Engineer
02/2020 - 06/2020

Cypress College
CS (Not Completed)
02/2015 - 05/2018

LANGUAGES

English & Arabic
